How would you like to turn your next Lego® creations into a robot, programmed to do just what you tell it to do? The Bricks 4 Kidz Junior Robotics program offers all the fun of building with Lego® bricks, PLUS the challenge of computer programming!

Students will use LEGO® Bricks, axles, pulleys, gears, motors and more to build a variety of models. Then using a drag and drop icon-based software, this unit provides an introduction into the world of computer programming and robotics that will equip children to succeed in a technology based marketplace.

We will be using motion sensors and tilt sensors for more programming depth!
