HAMDEN RECEIVES GRANT TO FUND INSTALLATION OF 2 ELECTRIC VEHICLE CHARGING STATIONS

HAMDEN –Mayor Curt Balzano Leng is very pleased to announce that the Town has received grant funding from the State of Connecticut Department of Energy and Environmental Protection which will fund Hamden’s first electric vehicle (EV) charging stations. This grant agreement totals \$17,786.00 of State funding, via the State Agency Electric Vehicle Charging Station Reimbursement Program, which will be allocated towards the installation of two dual head pedestal electric vehicle charging stations within Hamden. This award covers the expenses of all equipment and installation of both stations.

The new electric charging stations will service two (2) locations in Hamden, with the first station located at the Town Hall/Police Department parking garage and the second station located at the Spring Glen Municipal Parking lot. These locations were chosen based on their central locations, availability of utilities, public accessibility, and availability of the required space for installation. The Hamden Energy Use and Conservation Commission recommended applying for the program earlier in the year and the Hamden Legislative Council approved the grant at the November 4th meeting.

The Town of Hamden is optimistic that the installation of these electric vehicle charging stations will promote “green” transportation alternatives throughout the local area. Residents with questions about the charging stations, or who are interested in exploring options related to greener methods of transportation, are encouraged to contact the Hamden Mayor’s Office by calling 203-287-7100.

For further information, please contact Information & Research Officer, Patrick J. Donnelly at
